DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 9-13 are rejected under 35 U.S.C. 102(a) as being anticipated by Admitted Prior Art (hereinafter referred to as “APA”- the citations below pertain to Applicant’s specification).

APA teaches the following claimed limitations as follows:

9. A memory device comprising:

a gate stack (APA- Fig.2A and page 3 [0007];

a nitride layer adjacent each of said vertical oxide spacer and each said gate stack neither of the nitride layers extending to overlay the contact opening between the gate stack pair (APA- Fig. 2C (12) and page 3 [0007]) wherein the vertical oxide spacer is recessed from a top surface of each gate stack (Fig.3 (11) – inside contact hole the oxide is etched and therefore is “recessed”).

10. The memory device of claim 9, wherein said gate stack comprises a floating gate and a control gate (APA- Fig.1 (4 and 6) and page 2 [0006]).

11. The memory device of claim 9, wherein said vertical oxide spacer is between about 50 Å and about 300Å in thickness (APA- page 3 [0007]).

Art Unit: 2813

12. The memory device of claim 11, wherein said vertical oxide spacer is about 100A and about 200A in thickness (APA- page 3 [0007]).

13. The memory device of claim 9, wherein said nitride layer has a thickness equal to about one half the width of said vertical oxide spacer (APA – compare Fig.2C (11 and 12)).

Response to Arguments

Applicant's arguments filed 12/6/06 have been fully considered but they are not persuasive. Applicant argues that APA fails to teach a recessed oxide spacer- however as cited above and shown in Fig.3- APA does teach a recessed oxide spacer.

Conclusion
